SUMMARY

Software Engineer specializing in modern web ecosystems. Experienced in managing projects from start to finish through independent web development services. Has a deep interest in creating interactive and scalable UI/UX, SEO optimization, and implementing clean code

FEATURED PROJECTS

Nielcode: Website & Mobile App Development Agency

www.nielcode.com

- Architected and launched a full-scale freelance agency platform using **Next.js**, **Tailwind CSS**, and **shadcn/ui**, establishing a reusable component library that reduced development time for new client projects by ~40%
- Engineered advanced UI animations with **GSAP** and **Framer Motion**, delivering smooth, performant interactions, maintaining Lighthouse performance scores above 90 across all pages

Kunime: Open Source Anime Streaming App

github.com/kudanilll/kunime

- Designed and implemented a **full-stack client-server streaming architecture**, separating mobile frontend concerns from backend data processing to ensure scalability and independent deployability
- Built a lightweight, minimalist mobile interface using **Flutter**, optimizing for low-bandwidth scenarios with lazy loading and efficient state management
- Developed and deployed a **high-performance RESTful API in Go (Golang)**, self-managed on VPS infrastructure using **Docker** for containerization

Kupass: Open Source Password Manager

github.com/kudanilll/kupass

- Built an **offline-first Android password manager** using **Kotlin** and **Jetpack Compose**, applying modern declarative UI patterns to deliver a responsive, fluid user experience without internet dependency
- Implemented a **multi-layer security architecture** with high-grade database encryption via **SQLCipher**, ensuring all stored credentials remain protected at the storage level even if the device is compromised
